

Setting Origin

If your ORG reads anything other than 0, 0 perform the following:

1. Press the XY button on the keypad.
2. Using the arrows located around the XY button, move the focus carriage into the upper left corner until the POS "position" reads 0, 0.
3. Scroll down to reset origin and press select.
4. You will be asked to confirm, press "yes set new origin".
5. Scroll down to re-home XY and press select.
6. After focus carriage moves to the home position, press escape 3 times.
7. Scroll down to Preferences and press select.
8. Scroll down to Configuration and press select.
9. Press Escape twice.
10. Turn the system off and then back on.
11. Press XY to confirm ORG reads 0, 0.
